"THE LAST MALE MEMBER OF THE FAMILY IS KHARD."—We are informed by a gentleman direct from Polk county that John Flynn, the last male member by a John Flynn, the last male member of the family, is killed. It will be recollected that about one year ago trouble arose between the Wimberlys and Flynns about a horse-race; that is, one of the Wimberlys whipped one of the Flynns at the race, and the next day two of the Flynns—father and son, the former an cx-Sheriff and the latter then acting Sheriff—went to Wimberly's house and shot at Wimberly. Wimberly returned the fire, and succeeded in killing both of them. Illackwell, a son-in-law of Flynn, Sr., then took out letters of administration on his father-in-law's estate, and tim on his father-in-law's estate, and the Flynns were opposed to his selling the property, and shot Blackwell. The Fyuns were then arrested, and one of them imprisoned, while the other proved as alibi, but was shot as he was coming out of the Court-house. John Flyon, the last one, broke jail about Christmas. makad been lying around and making makad been lying around and making trips back and forth to the Indian Na-tion. On Saturday last they heard of his being in the neighborhood, and pro-cured a warrant for his arrest and went in search of him. They came upon him about daylight last Sunday morning. about maying a list summay morning. He drew his weapons and made fight, when the posse fixed upon him, shooting him through the body and through the head.—[Hot Springs (Ark.) Courier.

New Application of Stram.—On the 11th of January last, Mr. McCarty secured a caveat for what he calls "McCarty s Patent Smoke Consumer," and vestorday we witnessed its operation in the furnace of the Walker House boilers, it is recordly simple consisting merch. It is extremely simple, consisting merely of pipe, which conducts steam from the boiler to the furnace, where it is distributed by two jets over the fire. The philosophy of the working is, we believe, that the oxygen and hydrogen gases in the steam iguite on coming in contact with the fire, and the heat envolved is so intense that the smoke is consumed.

That this is true is proved, by the fact that when the steam is on, no smoke is seen insuing from the stack, and the ef-fect can be seen by the gauge. It is claimed—and from what we saw we beiters it to be so—that fully 25 per cent.
of fuel is saved by the application of the
"Smoke Consumer." Different parties
who have examined it say it can be applied to smelting furnaces with as much
advantage as to boilers, and furnace men and those who use sterm, should not neglect giving it an investigation, as it will undoubtedly be to their advantage. | Salt Lake New Endowment.

Professor Donaldson, an adventurous American aeronaut, intends to attempt to cross the Atlantic this summer in a large baloon. The baloon which he has made for the purpose will weigh about two thousand pounds, will contain two handred and sixty-eight thousand feet of gas, with two small reservoirs to provide against leakage, and an electrical ar-rangement for light. The Professor expects to accomplish the trip in from seventeen hours to two days and a half, and if the experiment proves successful, intends to establish a baloon mail and passenger line around the world!
